Oxy Booster Information Sheet

Oxy booster is based on a number of key ingredients that have a range of well-documented health benefits, in particular negatively charged water, colloidal gold and DMSO.

The key benefits include:

Anti-inflammatory properties - can ease the swelling associated with inflammatory conditions like arthritis, bursitis, rheumatism, and tendonitis. Reduces bruising and aids in the rapid repair of muscle injuries. Has been known to stabilize tumours and prevent new growth.

Pain Relief - It provides rapid amelioration of pain and increased mobility. A positive response is usually seen within 5 to 20 minutes and lasts for up to 4 to 6 hours.

Disease treatment - can aid in the treatment of autoimmune diseases. Early independent studies of colloidal gold show that it may also help improve neurological diseases in some patients. The combined ingredients in Oxy booster also have antibacterial, antiviral and antifungal properties.

Enhanced moods - can help individuals who are suffering from imbalanced emotional or mental states such as anxiety, depression, frustration, Seasonal Affective Disorder, and restless sleep.

Improved cognitive function - reduces mental fog and forgetfulness. It is useful when trying to reduce the use of alcohol or drugs and some studies have shown an improvement in IQ.

Rejuvenating properties - has a positive impact upon the body's most important biological functions, including rejuvenation of the glands and repair of damaged DNA.

Temperature Regulation - It is known to positively affect our bodies' warmth mechanisms, resulting in a decrease in temperature-based issues like hot flushes, chills, and sweating at night.

Libido - It stimulates the nerves that results in a decrease in nervous pressure, and invigorates the sexual organs, boosting the libido, alleviating impotency and functioning as a serviceable aphrodisiac.

Weight Management - it is thought to reduce hunger, increase vitality, and balance mood and address glandular dysfunction.

Detoxification & Antioxidant - binds with toxic heavy metals to aid in their removal from the body, and increases the permeability of cell membranes, allowing flushing of toxins from the cells. It is a powerful antioxidant, regulating the immune system and protecting the cells from

mechanical damage by increasing the production of white cells and macrophages that destroy foreign material and pathogens in the body.

Potencies and boosts oxygen levels - DMSO penetrates the skin and the blood-brain barrier with ease to enter the bloodstream. This boosts the level of oxygen in the blood stream and acts as a carrier for other substances, which also potentiates their effect. May provide a natural sports aid by boosting oxygen levels, supporting circulation and enhancing energy levels.

Application: Spray on area twice daily or with severe conditions spray on the area to reduce pain when necessary.

Allergic Reaction: The products may cause some itchiness, red patches on skin surface or pin feelings. These conditions will disappear after a few times application. If these symptoms persist, please consult your local GP.
